

Residency Training Program Registration Form
for **Neurology**

1. Date of application

2. Sponsoring institution

Name:

Address:

Phone:

3. Program Supervisor (must be an active AiCVIM Diplomate)

Name:

Title:

Email:

4. Clinical caseload (/yr) at the applying institution over the past 12 months.
Additional documents to prove the caseload described below may be
required separately (i.e. case list with diagnosis and hospital ID).

Total Neurology caseload (new patient): /year

5. How many residents do you recruit for this application?

6. List residents currently participating in your training program.

Resident Name	Start Date(mm/dd/yyyy)	End Date(mm/dd/yyyy)

7. Structure of the training program to include (but not limited to): the length and number of clinical rotations per year; distribution of time allocated for research, exam preparation, and vacation.

	Year 1 Weeks	Year 2 Weeks	Year 3 Weeks	Total Weeks	On- or Off-site?
Clinical Training (96 weeks)					
Neurology, Directly Supervised by Supervisor, Minimum of 50 weeks					
Neurology					
Neurology, Directly or Indirectly Supervised by Supervisor, Up to 25 weeks					
Neurology					
Required non-Neurology Diplomate Supervised Rotations, minimum of 21 weeks					
Internal Medicine				(2)	
Ophthalmology				(1/40hrs)	
Emergency Service				(2/80hrs)	
Diagnostic Imaging				(2/80hrs)	
Clinical Pathology				(1)	
Neuropathology				(1)	
Other trainings in 2-week blocks					
Additional time (60 weeks)					
Clinical Training					
Studying				(8)	
Vacation				(6)	
Total	52	52	52	156	

8. List of Supporting Diplomates

*Pre-approval is required for off-site personnel.

[illegible]

9. Please place a check mark in the boxes below and respond to the requests after you read following sentences to confirm the program you submit satisfies the requirement. AiCVIM RTC strongly recommends the supervising diplomates to inquire for assistance in advance.

- ☐ Is case management directly supervised and reviewed by a Diplomate of the AiCVIM (Neurology)? Diplomates need to step in as needed.
- ☐ Does each resident in your program take the primary role in patient management, including patient receiving, diagnostics, case management and decision making, client communication, case follow-up, and communication with referral veterinarians?
- ☐ Does your program provide enough time (minimum 80 hours/3 years) for journal club to train residents for critical review of literature?
- ☐ Does your program provide enough time for residents to pursue research activity for publication requirement?
- ☐ The neurology specialty requires that the supervisor meet with the resident at 6-month intervals to assess, review and critique the resident's progress and weekly schedule of activities. The advisor must provide written documentation of the review that will be sign by both advisor and resident.
- ☐ Does your program support residents to give a formal presentation at a conference at least once per year during the residency training program?
- ☐ A Neurology RTP must provide intensive formal review sessions for residents on topics covered in the General and Specialty Examinations. This requirement could be met in part by attending an ACVIM Neuroscience Course (Brain Camp), the ACVIM Forum, or ECVN Forum.

- ☐ Does each resident have at least 4 weeks protected and uninterrupted study time prior to the General Examination and at least 4 weeks protected and uninterrupted study time prior to the Specialty Examination?
- ☐ Participation in emergency service on a rotational basis; cases seen may be limited to neurology. Please provide a specific description of the emergency duty.

Additional Information?

Is there any additional pertinent information that the Residency Training Committee should consider in its evaluation of this training program? If yes, please provide the details below.
